Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-24 and 29-37 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bagby '953.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bagby '953 in view of Brantigan '915.

Bagby discloses in figures 1-11 a method for inserting a spinal implant across a disc space, substantially as claimed. However, Bagby doesn't the method step of positioning a sleeve, having an extension over a spinal distractor. Brantigan teaches in figure 4 a method of inserting a spinal implant comprising positioning a sleeve 33 over a spinal distractor (the drill), wherein the sleeve has an extension 23. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the sleeve having extensions as taught by Brantigan could be used with

the drill disclosed by Bagby in order to guide the drill into proper alignment with the vertebrae during the drilling process. The extensions would hold the sleeve in proper alignment during the drilling process.

Claims 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 26 above, and further in view of Froning.

Froning teaches in figure 4 a method of inserting an implant 46 through a sleeve 31. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the implant disclosed by Bagby could be inserted through a sleeve as taught by Froning in order to prevent damaging the implant during the insertion step.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. No additional prior art was cited in this office action.
